

When The Stomach Stops

Working Properly, Because There Is Wind In It, Use Stuart's Dyspepsia Tablets to Set It Going Again.

A Trial Package Free.

The doctors call it flatulency, but unprofessional folks know it as "wind in the stomach," and a most distressing condition of this great motor organ. Always annoying and painful in the extreme, at times often leading to bad and fatal results. The stomach, embarrassed and hampered with wind, cannot take care of its food properly and indigestion follows, and this has a train too appalling to enumerate. The entire system is implicated—made an active or passive factor in this trouble and life soon becomes a questionable boon.

All this is explained in doctor books; how undigested food causes gases by fermentation and fermentation in which process some essential fluids are destroyed—burnt up—wasted by chemical action, followed by defective nutrition and the distribution through the alimentary tract of chemically wrong elements and as a consequence the stomach and entire system is starved. Plenty of food, you see, but without preparation and worse than that, without a stomach to receive it is the epitome of evil; nothing too bad to emanate from it, but the gas it generates is probably its worst primary effect and the only way to do away with this is to remove the cause. Stuart's Dyspepsia Tablets go to the root of this trouble. They attack the gas-making forces and render them harmless. Flatulency or wind on the stomach simply cannot exist where these powerful and wonderworking little tablets are in evidence.

They were made for this very purpose to attack gas making forces and convert them into proper nutriment. This is their province and office. A whole book could be written about them and then not all told that might be told with profit to sufferers from this painful disease, dyspepsia. It would mention the years of patient and expensive experiment in effort to arrive at this result—of failures innumerable and at last success. It would make mention of the stomach which receives that enter into this tablet and make it faithfully represent all.

Stuart's Dyspepsia Tablets are not alone intended for the sick, but well folks as well for the person who craves hearty foods and wants to eat heartily and run no risk of bad effects, they act like a charm and make eating and digestion a delight and pleasure. They keep the stomach active and energetic and able and willing to do extra work without special labor or effort. Don't forget this. Well people are often neglected, but the Stuart's Dyspepsia Tablets have them in mind. A free trial package will be sent any one who wants to know just what they are, how they look and taste, before beginning treatment with them. After this go to the drug store for them; everywhere, here or at home, they are 50 cents a box and by getting them at home you will save time and postage. Your doctor will prescribe them; they say there are 40,000 doctors using them, but when you know what is the matter with yourself, why go to the expense of a prescription? For free trial package address F. A. Stuart Co., 150 Stuart Building, Marshall, Michigan.

SHORTAGE OF SNOW IN ARIZONA ALSO

The Watersheds of Streams Have Nothing to Keep Them Running.

Phoenix, Ariz., Jan. 20.—New Mexico hasn't anything on Arizona in the way of a mild winter. There has been very little snow in Arizona this year and the United States weather bureau's bulletin says that the depth of snow in December, 1910, was greatly below the normal amount. Light to moderate snows fell in the northern counties on the 27th, 28th and 31st, and light rainfall in the central counties on the 19th, 20th, 26th, 27th and 28th. Little or no precipitation occurred at the low-level stations in the southern counties.

Where from 10 to 50 inches of snow remained in the mountains during the latter part of December, 1909, there were only 6 to 15 inches in the mountains above the 5000 foot level at the end of December, 1910. All of the precipitation in the territory, below the 7000 foot level, was mainly in the form of rain. The precipitation was not heavy enough to produce any marked run-off in any of the streams. There were, however, small flows in the upper Verde, the upper and lower Salt and the upper Gila watersheds. The San Pedro was almost dry, with but very little running water. The volume of stream flow was fully 65 percent less than that of December, 1909. The ranges in the central counties are in excellent condition—grass one to four inches in length covering the desert, but in the southern counties, owing to the lack of moisture, they are in poor condition.

The deficiency in the average depths of snowfall in the mountains for December, 1910, as compared with that of December, 1909, is as follows: In the Salt and Verde watersheds, 12.5 inches; Gila watershed, 4.9 inches; Agua Fria and Hassayampa watersheds, 8.5 inches; Little Colorado watershed, 3.5 inches; 2.1 inches, Agua Fria and Hassayampa area in valleys, 0.0 inch; in mountains, 1.3 inches. Little Colorado area—in valleys, 2.3 inches; in mountains, 16.7 inches.

FIVE ROOMS, BATH AND PIANO FOR ALL

Former Arizona Examiner Has Freak Platform in Race for Congress.

Tucson, Ariz., Jan. 20.—Five rooms, a bath and a piano for every man in the country, is the platform on which Charles Purdon, former examiner of corporations in Arizona, has announced himself a candidate for congress from Arizona in the event statehood is secured.

Purdon's announcement of his candidacy was made at Duluth, Minn., according to papers from that city, and in speaking of his proposed campaign he is quoted as saying:

"When I make my campaign for congress, I will make it on the basis of five rooms, a bath and a piano for every man in the country. I will make it on the basis of five rooms, a bath and a piano for every man in the country. I will make it on the basis of five rooms, a bath and a piano for every man in the country."

"I have in mind the making of three floats to be used on the streets, with a band to add to the attractiveness of the whole. On the first float I would probably have a representation of the Roosevelt home at Oyster Bay, with the children at play there. On the second, I would have a monster dinner table, with the legend, 'The Pull Dinner Table of 1906.' On the third I would show a room, nicely furnished and containing a piano. Five rooms, a bath and a piano for every man in the country, is the platform on which I will make my campaign."

Las Cruces and Mesilla Valley

PLANS MADE FOR A DEMONSTRATION DAY

Farmers of Mesilla Valley to Meet at College on January 28.

Las Cruces, N. M., Jan. 20.—The big demonstration day at the New Mexico College of Agriculture will be on Saturday, January 28, the program to commence at the seed house at 10:30 a. m. Special features have been arranged and a free lunch will be served to all present at noon. The aim of the demonstration is to assist as much as possible in instructing the farmers of the section in the work necessary to make the farms a success. The program will be as follows:

The Program.
10:30—Address, director Foster, at the seed house.
10:45—Animal husbandry—stock exhibit of registered cattle, sheep, swine and goats. Standard varieties of poultry. Feeding experiments with pigs, dairy cows and poultry. Dairy laboratory, showing modern sanitary dairy equipment, including various separators, churns, butter workers, sanitary milk pails, etc., at Wilson hall. Incubator room showing various makes of incubators in operation.
11—Lunch at Hadley hall, served by the domestic science department. The demonstration of the work being done there. The lunch will be followed with an address by president Garrison.

1—Inspection of library, machine shops and science hall.
1:15—Domestic science—Exhibit in household economics department of cooking and sewing, with special demonstrations in the use of fireless cookers and other devices; cooking of tough cuts of meat; churning for home use, etc., conducted by Prof. Miller and Miss Thompson.

1:15—Agriculture—Exhibit of Rio Grande valley soils; experiments showing effects of cultivation upon small grains; field demonstration, including tests of disc, sulky and walking plows; farm machinery exhibit; grain and alfalfa experiments; conducted by Prof. J. H. Squires, Mr. Schultz and Mr. Willard.

1:15—Irrigation engineering—Exhibit of pumping plant in operation; devices for measuring the water used for irrigation; use of the farm level for leveling land and constructing ditches; conducted by Prof. Bixby, Mr. Stocking and Mr. Phelps.
3:15—Horticultural department—Methods of pruning the peach, apple and pear tree; various kinds of orchard heaters in operation; examination of the Union seed house; demonstration of spraying machinery in operation; methods of orchard management, including apples, peaches, pears and grapes; conducted by Prof. Garcia. Mr. Mundell and Mr. Rigney.

NEW SURVEY WILL BE MADE OF VALLEY

Las Cruces, N. M., Jan. 20.—It is understood from the reclamation engineers that an entirely new survey of the Mesilla valley will have to be made before the water rights for the various lands can be satisfactorily adjusted.

Two surveys have already been made, these having been made by the United States engineers. It is claimed that both of these surveys were faulty, the last one, in several instances, it is said, having the same land and the same number of acres charged three and four times to the same different people. The new survey will be made within a short time and will clear up all of the existing discrepancies and conflicts so that the proper apportionment of water will be possible.

NEW MEMBER ADDED TO THE EXPERIMENT STATION STAFF

Agricultural College, N. M., Jan. 20.—Prof. F. W. Christensen has arrived from State college, Pennsylvania, and will be employed here on experiment station staff. At present he will take up the work of animal nutrition.

It is planned by the department of animal husbandry to feed 10 steers to determine the digestibility of alfalfa, and also the gain in weight per animal.

A well attended meeting was held by the Agricultural club and the foreign program was rendered: Alfalfa Growing, Andrew Patterson; Poultry Raising in Mexico, M. R. Diaz; Sheep Raising in New Mexico, Herminio Aragon; Current Agricultural News, Henry McCowen.

Professor Squires lectured in general assembly on the subject of sciences as allied to agriculture. He brought out the necessity of a knowledge of biology, geology, chemistry, physics and mathematics.

The faculty members are planning to favor the local people with a play in a short time. The play known as "Politics" is being rehearsed now under the direction of Professor Ray M. White.

The classes have elected representatives to the commission now and the commission form has full control of student government now. Those composing the commission are: Campbell, president; Stewart, vice president; John Anderson, John Haggart, Miss Ruth Brainard, Miss Edna Anderson, Kenneth Ogilvie, Earl Geyer, Miss Lath, Miss Pitts, John Blain and James Nourse.

MERRY VILLAGE CLUB ELECTS DELEGATE TO CONVENTION.
La Mesa, N. M., Jan. 20.—The Merry Villagers club held a meeting yesterday afternoon at the home of Mrs. R. S. Jackson. Mrs. J. R. Livens was elected a delegate to the territorial convention of the Women's clubs, to be held in Las Cruces in February. As many members of the club as possible will be there to see the new building, one of the most beautifully appointed luncheons of the season was spread by the hostess.

For Breakfast Try "Red Ball" Oranges
Luscious Tree-Ripened Fruit

It is not sufficient to know that oranges are the most healthful of all fruits. It is quite as important to know the kind of oranges that are most healthful and most palatable. Carefully grown and painstakingly picked California oranges are now packed under the label "Red Ball." Please serve "Red Ball" oranges at breakfast tomorrow and learn the superiority of tree-ripened, seedless oranges over the commonplace kind.

These oranges are hand-picked. No orange that falls upon the ground ever bears the "Red Ball" label. The "Red Ball" orange is a firm, thick-skinned variety, labeled "Red Ball." You will recognize them by the tissue wrapper, labeled "Red Ball," in which each individual "Red Ball" orange is packed. Nearly every dealer in the country sells "Red Ball" oranges. Don't fail to save the wrapper. They are valuable.

"Red Ball" Lemons Juiciest
Lemons differ as much as oranges. Pithy, thick-skinned lemons contain very little juice. You waste money when you buy them. Please ask for "Red Ball" lemons and note how uniformly sound each one is—and what a small percentage is skin and core.

Get This Valuable Orange Spoon
Save 12 "Red Ball" orange (or lemon) wrappers and send them to us, with 10c to pay charges, packing, etc., and we will present you with a genuine Rogers Orange Spoon, of beautiful design and highest quality. Begin saving wrappers today. In returning, please send recent stamp when the amount is less than 24 cents; on amounts above 24 cents, we prefer money order, express order or bank draft. Don't send cash. We honor both "Red Ball" and "Sunbelt" wrappers for premiums.

Send for our Premium List. Address all correspondence to (60) CALIFORNIA FRUIT GROWERS' EXCHANGE, 34 Clark St., CHICAGO

To Grow Hair On A Bald Head

BY A SPECIALIST.

Thousands of people suffer from baldness, falling hair, who, having tried nearly every advertised hair tonic and hair grower without results, have resigned themselves to baldness and its attendant discomfort. Yet their case is not hopeless; the following simple home prescription has made hair grow after years of baldness, and is also unequalled for restoring gray hair to its original color, stopping hair from falling out, and destroying the dandruff germ that makes the hair greasy and can be put up with perfume, add half to one teaspoonful of Talo-Kal Perfume, which unites perfectly with the other ingredients.

This preparation is highly recommended by physicians and specialists, and is absolutely harmless, as it contains none of the poisonous wood alcohol so frequently found in hair tonics. Do not apply to face or where hair is not desired.

Before publication we presented this prescription to A. E. Ryan & Co., People's Drug Store, this city, and they state that they have filled many times for their patrons, who report most astonishing results from its use.

Clergyman's Son Cured of Tuberculosis

To neglect a cold, bronchitis, lung trouble or Consumption is dangerous. We all know that people are apt to deny they have Consumption. It is a flattering disease, and the sufferer is filled with bright hopes of improvement. Call Consumption by its own real name—and then—take Eckman's Alternative, because it is effective in Tuberculosis. It has cured about 100,000 cases. Investigate the following—

Amelia, N. Y.
Gentlemen: "Prior to Feb. 1, 1909, I was located in Rochester, N. Y., suffering with LaGrippe, which developed into Tuberculosis. My physician gave me one month to live. I was having terrible night sweats and mid-day chills
